## STATEMENT OF INTENT

In the last few years, Kolkata Chapter of CSI has been trying to rejuvenate a creative environment for IT & Computer Science & Engineering-related activities for academicians, researchers, and professionals from the industry. Towards this goal, improving the quality of conferences, lecture meetings, summer/winter courses, awareness activities, publications, etc. are very important aspects. In addition, we must continue to encourage technical interaction among members through workshops, lecture meetings, conferences, learning programs, Computer Day celebrations, as well as quality publications. During my editorship of Hard Copy- the Newsletter of the Kolkata Chapter of CSI, I was able to motivate various technical writings from academicians, researchers, and IT professionals for every issue. I had also chaired the Tutorial session of EAIT 2014 conference where Prof. June Sung Park of KAIST: South Korea (and SEMAT Chairman) delivered a tutorial. Recently, CSI: Kolkata Chapter has been organising an "*Outreach Programme*" for Sunderban school children as part of its CSR activity. There I had the privilege of lecturing on Computer Fundamentals to school-going children who come from villages where there are no computers, and even lacking electricity in some schools. Computers were also donated.

If elected, I will try to get the most out of my professional as well as teaching experience to improve the quality of programmes of the Society, and try to reduce the *digital divide* between the urban privileged and the under-privileged from the villages, and other parts of the society at large.
