Statement of Intent

- Region 1 (North India) has abundant opportunities for growth of CSI and for enhanced value that can be provided to the member community. I am a strong believer in collaboration of Industry-Academia-Government.
- To bridge the 'Industry – Academia' gap and making it a for a win-win proposition to all the stakeholders. Industry gains by getting employment ready candidates and less effort on training them. Academia benefits by higher and better quality of placements due to continuous feedback from the Industry.
- Region-1 is geographically very vast, but CSI membership penetration is lower than its potential. I shall work to increase membership base in the region
- I will utilize my networking in Industry for the benefit of CSI members (www.linkedin.com/asaurabh)
- Several chapters in the region are almost defunct. I shall work with all my capabilities and CSI experience to revive these chapters and make them active so that they can contribute to CSI vision
- As part of Execom, I will ensure steps are taken to bring CSI back to its past glory which has taken a hit in the recent times

Statement of Intent

Dear CSI Members,

CSI has been passing through a difficult phase in recent years, I am happy to see that with the interference of Hon'ble Court we are still coming back on track and these new elections have been initiated. As I have always been a believer to act and contribute to whatever best I can I am contesting the election of RVP 3 which includes the states of Rajasthan, Gujarat and Madhya Pradesh. I am confident to contribute to these CSI members of these states to reach their vision due to which they all have joined this Society. I will be keen to work with various student branches to bring them knowledge and exposure at various levels during their student membership tenure. I understand that last 4 years many of the student branches have disappeared, hence will make all efforts with the team of CSI Chapters in region 3 to convince them to bring back the student branches and to open more branches. Also, will focus to increase the professional membership and Institutional membership to have more members and accordingly increase the membership share of the chapters. Another focus will be on organizing and supporting activities in the region to create a visible presence of CSI at National and Global Levels. My global experience at International Federation for Information Processing in last 4 years will help to achieve the goals.

I always believe in working together and further believe and the members in regions and myself can work together in achieving a 3-point agenda as below for the greater good of CSI.

1. Involving New Young Members with CSI and sharing on the roles and responsibilities within the coming years which will prepare them to be Leaders of the Future CSI
2. Increasing the revenue earned by Chapters through membership and successful activities including CSI activities and conventions to create national and global presence.
3. Opening of dormant and new student branches at the Chapter levels which will help in bringing glory of CSI again.

I welcome everyone to join me to make CSI more Vibrant. I feel confident on my nomination as RVP (Region 3) and looking forward to your support to make it happens.

Best Wishes
