Statement Of Intent

Computer Society of India is the leading society of Computer and IT professionals and is expected to lead and direct national level policies, developments and activities for youth, people and the society in CSE and IT. This requires activities and recognition as the main leading group. For some time CSI is passing through a difficult phase due to internal conflicts. I therefore intend to,

- a. Bring all members together and Create harmony in meetings and activities.**
- b. Promote and Undertake activities of local, national, international level in all areas of CSE and IT so that CSI centres and Council can sensitise people and policy makers in areas of interest for the nation and make recommendations for suitable action / plans in the areas.**
- c. Lead and promote activities at institutions so as to develop Computer and IT professionals of international repute.**
- d. Promote and sponsor research in key areas to make India technologically advanced in CSE and IT and related areas**
- e. Promote use of AI and AI based systems and solutions in banking, defence, design, disaster management, education, healthcare, manufacturing, production, etc.**
- f. Undertake development of India specific and international standards and publications.**
- g. Make CSI a globally relevant organization, respected by professionals and others in the society.**
